SIZING UP *the right rug*

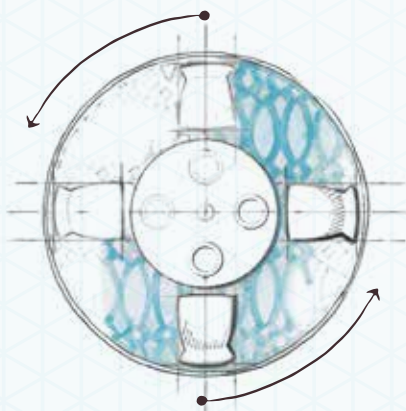

A new rug can change your whole room—lay down style, warmth and comfort!

1

Placing the front legs of furniture on a rug helps
define your space

2

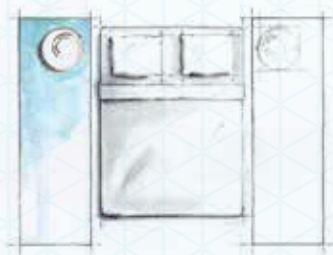

A round rug accentuates the shape of a round table, and is playful & cozy.

3

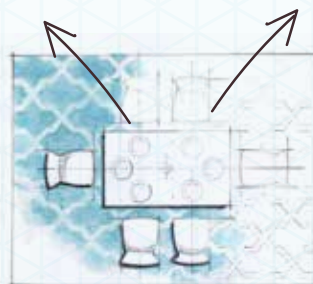

A rug that extends at least 18" around your bed looks balanced and warms up the room.

4

Runners work in unexpected places—bedside, even a galley kitchen.

5

Consider a rug large enough to pull out chairs.
